

## Distance Records for Leader's Transport Calculations

Updated 4 January 2013

Note:

- The distances given are one-way from Civic.
- Distances to locations that are not listed would be welcome.
- Some distances are not accurate and I'd be grateful if you could let me know if you measure significant differences and I'll correct them.
- The values given are intended as an aid for leaders; there may be good reasons for variations e.g. a different route; transport vehicles all starting 15km south of Civic.
- Where one vehicle comes from North Canberra and another from South Canberra, past practice has been to standardise and quote values and costs from Civic.
- Example calculation: Given a one way distance of 81 km, rate of 37c per km per car.  
Cost:  $81 \times 2 \times 37c = \$59.94$  rounded to \$60; \$15 per person if 4 in the car or \$20 per person if 3 in the car.

<b>DESTINATION</b>	<b>DISTANCE (KM)</b>
<b>A</b>	
Apollo Road / Boboyan Road junction	41
Angle Crossing Road (also called Sunshine Road) / Boboyan Road junction	38
<b>B</b>	
Belconnen	10
Bungendore	38
